DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 07/27/2007 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 07/27/2007 was filed after the mailing date of the Notice of Allowance on 06/18/2007. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Anderson on 05/24/2007.

The application has been amended as follows:

Claims:

10. (Currently Amended) A communication system which is capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, the communication system comprising:

a cellular phone comprising:

a recording device which records connection information for making communication connection to the communication apparatus on the network;

a first transmitting device which sends the connection information to a ~~communication terminal~~ digital camera unit;

a first receiving device which receives information from the ~~communication terminal~~ digital camera unit; and

a second transmitting and second receiving device which sends and receives information to and from the communication apparatus on the network;
and

a ~~communication terminal~~ digital camera unit comprising:

a second receiving device which receives connection information for making communication connection to the communication apparatus on the network from the cellular phone; and

a first transmitting and first receiving device which sends and receives information to and from the communication apparatus on the network based on the connection information received from the cellular phone; and

a display for displaying connection information received from the cellular phone.

wherein the user selects a destination for a digital photographic image based on the displayed connection information.

12. (Currently Amended) A communication system which is capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, the communication system comprising:

a cellular phone comprising:

a recording device which records a menu of destinations of communication and connection information for making communication connection to the communication apparatus on the network associating pieces of the connection information with each other;

a first transmitting device which sends the menu to a ~~communication~~ terminal digital camera unit;

a first receiving device which receives information from a designated ~~communication-terminal~~ digital camera unit on the network; and

a second transmitting and second receiving device which, upon receiving the information of the designated communication apparatus on the network from the ~~communication-terminal~~ digital camera unit, performs dial-up connection to the communication apparatus on the network and sends connection information and thereafter sends and receives information to and from the communication apparatus on the network; and

a ~~communication-terminal~~ digital camera unit comprising:

a second receiving device which receives the menu of destinations of connection for making communication connection to the communication apparatus on the network from the cellular phone;

an inputting device which designates the communication apparatus on the network; and

a first transmitting and first receiving device which sends information of the designated communication apparatus on the network to the cellular phone and connects communication to the designated communication apparatus on the network to send and receive information; and

a display for displaying a menu of destinations received from the cellular phone,

wherein the user selects a destination for a digital photographic image based on the displayed menu of destinations.

20. (Cancelled)

21. (Cancelled)

22. (Currently Amended) The communication system according to claim ~~20~~ 10, wherein said digital camera further comprises:

a mode switching element, which switches between a photographing mode for generating a digital image, and a communication mode for communicating a digital image to a destination based on the menu of destinations received from the cellular phone.

23. (Cancelled)

24. (Cancelled)

25. (Currently Amended) The communication system according to claim ~~23~~ 12, wherein said digital camera further comprises:

a mode switching element, which switches between a photographing mode for generating a digital image, and a communication mode for communicating a digital image to a destination based on the menu of destinations received from the cellular phone.

Allowable Subject Matter

4. Claims 10-13, 22 and 25 are allowed over the prior art of record.

5. The following is an examiner's statement of reasons for allowance:

As to claim 10, the prior art of record fails to teach a system capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, i.e., a communication terminal comprising a second receiving device which receives connection information for making communication connection to the communication apparatus on the network from the cellular phone; and a first transmitting and receiving device which sends and receives information to and from the communication apparatus on the network based on the connection information received from the cellular phone.

As to claim 12, the prior art of record fails to teach a system capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, i.e., a communication terminal comprising a second receiving device which receives the menu of destinations of connection for making communication connection to the communication apparatus on the network from the cellular phone; an inputting device which designates the communication apparatus on the network; and a first transmitting and first receiving device which sends information of the designated communication apparatus on the network to the cellular phone and connects communication to the designated communication apparatus on the network to send and receive information.

These limitations in combination with the remaining limitations of claims 11, 13, 22 and 25 are not nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to My X. Nguyen whose telephone number is (571) 272-2835. The examiner can normally be reached on Monday through Friday at 8:00AM to 4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rafael Perez-Gutierrez can be reached on (571) 272-7915. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
